Date: 2026-06-07 (Analysis for week of 2026-06-09)

Week: 38

1. RESTATED RULES

- Universe: U.S.-listed common stocks, nano-cap to small-cap (market cap up to \$2B), NYSE/NASDAQ/NYSE American only.
- Exclusions: OTC/pink sheets, ETFs/ETNs/closed-end funds/SPACs, rights/warrants/units/preferred/ADRs, bankrupt/halted, defence, Israeli-affiliated.
- Long-only, full shares only. No options, shorting, leverage, margin, derivatives.
- Risk per trade: $\leq 5\%$ of portfolio equity. No single position $> 30\%$ of equity.
- Minimum cash reserve: 15% of equity.
- Max concurrent positions: 5.
- Sector cap: No more than 2 of 5 positions in the same GICS sector.
- Stops required on all positions. Default: $\max(1.5 \times \text{ATR}(14), 10\% \text{ below entry})$. Entry-discipline: wider of $1.75 \times \text{ATR}$, swing low, or technical level.
- Liquidity filters: Price $\geq \$1$, 3-mo ADV $\geq \$500\text{K}$, bid-ask $\leq 2\%$ ($\leq \$0.05$ if price $< \$5$), float $\geq 5\text{M}$.
- Must be above 20-day SMA at initiation (no SMA waiver for momentum plays).
- Post-earnings cooldown: No buy within 3 trading days at $> +5\%$ above post-print close.
- 10-trading-day re-entry ban after stop-out.
- Momentum plays: 5-trading-day minimum hold unless stop triggered.
- Market regime filter: If IWM below 50-day SMA, restrict new initiations to high-conviction catalyst-driven plays only.
- Pre-open verification required before Monday limit orders based on Friday close.
- Partial profit-taking: $\sim 1/3$ at $+30\%$, $\sim 1/3$ at $+60\%$, remainder on trailing stop.
- Day-1 drawdown rule: Exit at next open if position closes -8% or worse on entry day.
- No averaging down past -5% from entry unless material new catalyst confirmed by ≥ 2 sources.

Selected Candidates -- Deep Dive

TDAY (USA TODAY Co., Inc.) -- Communication Services

Thesis: Former Gannett, rebranded Oct 2025. Digital transformation reaching inflection point with AI licensing revenue surging +125.6% to \$18.8M (Meta, Microsoft partnerships). Digital revenue hit all-time high at 47.8% of total. Digital subscriptions +6.2% with record ARPU \$10.30. Q1 EPS \$0.10 vs -\$0.10 est (massive beat). Total revenue declining but rate of decline improving (210bp sequential improvement). Management says "nearing" inflection points discussed for 2 years.

Distance-from-base:

- 20-day SMA estimate: \$8.15 / 1.0682 ? \$7.63 -> 6.8% above (<=20% [OK])
- 50-day SMA estimate: ~\$7.30 -> 11.6% above (<=40% [OK])
- Breakout assessment: gradual uptrend, not a sudden breakout

Post-earnings cooldown: Q1 reported May 1. Current date June 9 = 27 trading days later. No cooldown applies.

Liquidity:

- ADV: ~1.7M shares x \$8.15 = ~\$13.9M [OK]
- Bid-ask: \$0.01 [OK]
- Market cap: \$1.1B [OK]
- Float: ~146M shares [OK]
- Exchange: NYSE [OK]

Conviction: 3/5 (raised from 2/5 on AI monetization verification -- +125.6% growth confirmed by earnings transcript + multiple sources)

Bear case:

- Print revenue secular decline still dominates top line (total revenue -4% YoY)
- AI licensing deals may be lumpy and non-recurring quarter to quarter
- Legacy debt load from Gannett era weighs on balance sheet
- Media sector faces structural headwinds from social media competition
- Digital subscription growth (6.2%) may plateau as addressable market saturates

Position sizing (showing work):

- Entry: \$8.15 (Friday close)
- Stop: \$7.20 (10% below entry -- wider than 1.75xATR ? \$0.44 -> \$7.71; use wider)
- Stop limit: \$7.10
- Risk/share: $\$8.15 - \$7.20 = \$0.95$
- Max risk (5% equity): $\$675.59 \times 0.05 = \33.78
- Max shares by risk: $\$33.78 / \$0.95 = 35.6 \rightarrow 35$ shares
- Max shares by 30% cap: $(\$675.59 \times 0.30) / \$8.15 = 24.9 \rightarrow 24$ shares
- Binding constraint: 30% cap -> 24 shares max
- Target: 16 shares (to preserve cash for INN + 15% reserve)
- Cost: $16 \times \$8.15 = \130.40 (19.3% of equity)
- Risk: $16 \times \$0.95 = \15.20 (2.25% of equity) [OK]
- ADV check: $\$130.40 / \$13,900,000 = 0.9\%$ of ADV [OK]

INN (Summit Hotel Properties, Inc.) -- Real Estate

Thesis: Premium upscale hotel REIT benefiting from FIFA World Cup 2026 (June 11 - July 19, hosted in US/Mexico/Canada). Q1 RevPAR grew +0.2% (beat expectations by 200bp), with March RevPAR accelerating to +4%. AFFO \$0.21/sh, FY26 guide 75-85c AFFO. 7.46% dividend yield. No debt maturities until 2028. Active share repurchases (1.4M shares for \$6M). Unrestricted cash \$34.8M.

Distance-from-base:

- 20-day SMA estimate: $\$5.74 / 1.038 \approx \$5.53 \rightarrow 3.8\%$ above ($\leq 20\%$ [OK])
- 50-day SMA estimate: $\sim \$5.45 \rightarrow 5.3\%$ above ($\leq 40\%$ [OK])
- Breakout assessment: moderate uptrend, volume ratio 5.13x (elevated interest)

Post-earnings cooldown: Q1 reported early May 2026. 20+ trading days ago. No cooldown applies.

Liquidity:

- ADV: $\sim 960\text{K shares} \times \$5.74 = \sim \$5.5\text{M}$ [OK]
- Bid-ask: likely $\leq \$0.05$ at \$5.74 price point [OK]
- Market cap: \$635M [OK]
- Float: $\sim 110\text{M shares}$ [OK]
- Exchange: NYSE [OK]

Conviction: 3/5 (raised from 2/5 on FIFA World Cup catalyst verification -- event dates confirmed, hotel sector direct beneficiary)

Bear case:

- \$500M shelf registration (filed Feb 25, 2026) enables potential dilution
- RevPAR growth only 0.2% (anemic baseline growth)
- FIFA World Cup tourism benefit may already be priced in by hotel REITs
- Hotel industry is cyclical -- if macro weakens, hotel stocks lead downside
- Creates 2 Real Estate positions (SHO + INN), at sector concentration limit
- Dallas hotel dispositions (\$19M) signal selective portfolio pruning

Position sizing (showing work):

- Entry: \$5.75 (limit, slightly above Friday close)
 - Stop: \$5.15 (10% below entry -- wider than 1.75xATR ? \$0.26 -> \$5.49; use wider)
 - Stop limit: \$5.05
 - Risk/share: \$5.75 - \$5.15 = \$0.60
 - Max risk (5% equity): \$675.59 x 0.05 = \$33.78
 - Max shares by risk: \$33.78 / \$0.60 = 56.3 -> 56 shares
 - Max shares by 30% cap: (\$675.59 x 0.30) / \$5.75 = 35.2 -> 35 shares
 - Binding constraint: 30% cap -> 35 shares max
 - Target: 22 shares (cash management -- maintain 15% reserve after all trades)
 - Cost: 22 x \$5.75 = \$126.50 (18.7% of equity)
 - Risk: 22 x \$0.60 = \$13.20 (1.95% of equity) [OK]
 - ADV check: \$126.50 / \$5,500,000 = 2.3% of ADV [OK]

5. PORTFOLIO ACTIONS

Keep

- WKC -- conviction 4/5. At 52-week high with strong momentum. FY26 guidance \$2.65-\$2.85 supports current valuation. Raise trailing stop to \$28.80/\$28.65 (locks in +10.8% from entry).
- SHO -- conviction 4/5. Raised FY26 outlook, strong Q1. Raise trailing stop to \$10.60/\$10.50 (locks in +3.9% from entry, protects against round-trip).
- IMPP -- conviction 2/5 (downgraded). Weak post-earnings action despite Q1 blowout. Only 3.4% from stop -- let the stop manage risk. Max loss capped at \$3.23 (0.5% equity). Do not add shares.

Exit

- ACCO -- conviction 2/5. Dead money for 5+ weeks despite Q1 beat. Analyst PT cut to \$5. EPOS acquisition not translating to price action. Recycling capital into higher-conviction plays. Dividend secured (ex-date May 22 already passed). Sell 29 shares at \$3.82 limit.

Initiate

- TDAY -- 16 shares at \$8.15 limit. Communication Services (new sector diversification). AI monetization inflection with +125.6% growth in licensing revenue. Conviction 3/5.
 - INN -- 22 shares at \$5.75 limit. Real Estate (2nd RE slot with SHO). FIFA World Cup catalyst June 11. Hotel REIT tourism upside. Conviction 3/5.

Maximum aggregate loss if ALL stops triggered simultaneously: \$43.37 (6.4% of equity). This is aggressive but acceptable given the directive and 14 weeks remaining.

8. MONITORING PLAN

WKC (World Kinect) -- Energy

- Watch: Resistance behavior at 52-week high (\$29.92). If breaks above cleanly, trend continuation likely.
- Risk: Morgan Stanley "underweight" with \$26 PT. Zacks downgraded to Hold 6/2. Analyst sentiment diverging from price action.
- Action trigger: If closes below new stop \$28.80, exit triggers. If breaks above \$30.00, consider raising stop to \$29.20.
- Partial profit check: Currently +14.7% from entry. Approaching +30% partial profit threshold at \$33.80 -- still ~13% away.

SHO (Sunstone Hotel Investors) -- Real Estate

- Watch: Follow-through on upgraded FY26 outlook. Monitor for any new investor presentations or capital return announcements.
- Risk: Stock at \$11.48 is 14.8% above consensus PT (\$10). Could mean re-rating higher OR analyst expectations need to catch up.
- Action trigger: If closes below \$10.60, exit triggers. If makes new high above \$11.60, raise stop to \$11.00.
- FIFA World Cup: SHO also benefits as hotel REIT -- monitor tourism flow data starting June 11.

IMPP (Imperial Petroleum) -- Energy

- CRITICAL: Only \$0.17 (3.4%) from stop. Despite Q1 EPS beat of 67.3% and revenue beat of 25.8%, stock declining.
- Watch: Tanker rate trends, Strait of Hormuz geopolitical developments, drybulk rates.
- Risk: Post-earnings fade suggests market views the rate boost as transitory. If tanker rates normalize, further downside likely.
- Action trigger: Stop at \$4.80 triggers exit. Max loss \$3.23 (0.5% equity). Do NOT lower stop.
- If stopped out: 10-day re-entry ban applies through June 23.

TDAY (USA TODAY Co.) -- Communication Services [NEW]

- Watch: AI licensing deal flow announcements. Any new Meta/Microsoft partnership expansions. Digital subscription growth metrics.
- Pre-open verification: Monday June 9 -- check pre-market before placing order. If pre-market down >2%, adjust limit or pass.
- STOP NOT LIVE until broker stop placed. Must place \$7.20/\$7.10 stop with broker before Tuesday open.
- Day-1 drawdown rule: If TDAY closes -8% or worse on entry day (\$7.50 or below), exit at next open.
- Minimum hold: 5 trading days (through June 13) unless stop triggered.
- Next earnings: July 30 -- monitor for any pre-earnings guidance changes.

INN (Summit Hotel Properties) -- Real Estate [NEW]

- Watch: FIFA World Cup opening June 11 -- hotel booking data, tourism flow reports, RevPAR commentary from hotel industry.
- Pre-open verification: Monday June 9 -- check pre-market before placing order. If pre-market down >2%, adjust limit or pass.
- STOP NOT LIVE until broker stop placed. Must place \$5.15/\$5.05 stop with broker before Tuesday open.
- Day-1 drawdown rule: If INN closes -8% or worse on entry day (\$5.29 or below), exit at next open.
- Minimum hold: 5 trading days (through June 13) unless stop triggered.
- Watch for dilution: \$500M shelf registration active -- monitor for any offering announcement.
- Dividend: 7.46% yield -- next ex-dividend date TBD, could provide downside cushion.

ACCO (exit monitoring)

- Watch: Ensure sell order fills at \$3.82 on Monday. If not filled by 10:30 AM, adjust limit down to \$3.80.
- Dividend note: June 17 dividend payment (\$0.075/share = \$2.18 total) is secured regardless of sale timing (ex-date May 22 already passed).

Overall Portfolio Thesis

The portfolio enters Week 38 with a clear strategic imperative: close the 8.8% gap to the S&P 500 benchmark over the remaining 14 weeks. The Week 38 restructuring deploys excess cash (reducing from 42% to 21%) into two diversified plays --

TDAY (AI/digital transformation) and INN (FIFA World Cup tourism) -- while recycling the underperforming ACCO position. The portfolio now spans three sectors (Energy, Real Estate, Communication Services) with five positions, maximum diversification within constraints.

Key portfolio characteristics post-restructuring:

- Fully deployed: 5 of 5 slots filled, 79.5% invested vs 57.9% previously
- Diversified: 3 GICS sectors, no sector exceeding 2 positions
- Risk-managed: 6.4% aggregate stop-risk, each position $\leq 2.3\%$ individual risk
- Catalyst-loaded: INN (FIFA World Cup June 11), TDAY (AI monetization ongoing), WKC/SHO (trailing momentum)
- Weak links identified: IMPP (2/5 conviction, 3.4% from stop) -- will likely self-resolve via stop within 1-2 weeks

The aggressive posture is reflected in higher deployment rate and acceptance of 2/5 conviction on IMPP (letting the tight stop manage). If IMPP stops out, the freed capital (~\$94) creates optionality for a new position in Week 39.
