

Week 44 Deep Research -- Full Report

Date: Sunday, July 12, 2026

Week: 44

1. RESTATED RULES

- Long-only, full shares, no options/margin/shorting. U.S.-listed common stock, nano- to small-cap ($\leq \$2B$ market cap). No OTC, ETFs, SPACs, ADRs, defence, or Israeli-affiliated names.
- Cash reserve floor: 15% of equity. No new capital beyond the snapshot (\$285.74 cash). Track to the cent.
- Position sizing: risk-per-trade $\leq 5\%$ of equity (shares = equity $\times 0.05$ / (entry - stop)); no single name $> 30\%$ of equity.
- Binary event plays: max 1 at a time, $\leq 15\%$ of equity; stop may use the binary-event override (technical support instead of ATR), auto-expiring within 1 trading day of the event.
- Momentum plays (from screener): no dated catalyst required, must be above the 20-day SMA at entry, standard stop max(1.5xATR, 10% below entry), minimum 5-day hold. Max 3-4 momentum positions.
- Sector cap: no more than 2 positions in the same GICS sector.
- Market regime filter: if IWM $<$ 50-day SMA, freeze new momentum initiations. Status this week: GREEN (IWM 295.99 vs 50-day SMA 279.06 -> new initiations permitted).
- Entry discipline: post-earnings cooldown, distance-from-base limits, ATR-based stops, pre-open verification, screener score = sourcing not conviction (start 2/5).
- One open order per stock: the protective GTC stop-limit occupies the single order slot; profit/exit targets are alerts, not resting orders.
- Verification: every ticker/catalyst confirmed by ≥ 2 independent sources or flagged INSUFFICIENT CONFIRMATION.

2. RESEARCH SCOPE

Data retrieved: 2026-07-12, ~16:20 ET (weekend session).

Portfolio/n
2026-07-1

Live sources consulted (WebSearch, 2026-07-12):

- Regime: IWM 50-day SMA (Investing.com / Barchart technicals) -- 279.06; IWM close 295.99 -> above.
- Holdings: WKC (SEC 8-K, rutlandherald, MarketBeat), SHO (SEC 8-K, StockTitan, TradingView), TDAY (SEC 8-K, stockanalysis, Insider Monkey), TILE (SEC 8-K, Motley Fool transcript, WallStreetZen).
- Candidates: ATRC (StockTitan, MarketBeat, WallStreetZen, Investing.com), PHAT (SEC 8-K, StockTitan, ainvest, kavout), OPRT (SEC 8-K, TipRanks, MarketBeat), BLFS (public.com, MarketBeat, stockanalysis), TARA (SEC 8-K, StockTitan, Protara IR).
- Screener rejects: TOI, SVC, CNMD, ESPR, MLTX, CDZI, IART, MXCT, EYPT, HNST, PDO, NCI (watchlist metrics + sector-cap logic).

Checks performed: regime filter, sector-cap map, market-cap ceiling (ATRC \$1.7B [OK]), liquidity (ADV), binary-event count, 15% floor, per-position 30% cap, entry-discipline cooldown/distance.

3. CURRENT PORTFOLIO ASSESSMENT

Ticker	Role	Entry Date	Avg Cost	Current Price	Current Stop	Conviction (1-5)	Status
WKC	Energy -- deep-value runner	2026-05	\$26.00	\$35.32 (+35.8%)	\$29.20 / \$29.05	4/5	KEEP -- 1-sh runner post +30% partial; earnings 7/23; raise stop
SHO	Real Estate -- quality REIT	2026-06	\$10.20	\$11.22 (+10.0%)	\$10.90 / \$10.80	3/5	KEEP -- at fair value; earnings 8/6; stop does the work
TDAY	Comm. Services -- AI-licensing	2026-06	\$8.15	\$8.51 (+4.4%)	\$7.20 / \$7.10	4/5	KEEP -- book leader; raise stop; Q2 late-July
TILE	Cons. Disc. -- beat-and-raise	2026-06	\$32.10	\$33.26 (+3.6%)	\$31.00 / \$30.85	4/5	KEEP -- earnings 7/31; Buy, PT \$36-37

Portfolio equity: \$713.68 · Cash: \$285.74 (40.0%) · S&P-equivalent: \$760.33 · Gap: ?6.1% · TWR alpha (cum): ?1.35% (now trailing).

4. CANDIDATE SET

Ticker	One-Line Thesis	Key Catalyst	Catalyst Confirmation Status	Liquidity Note
ATRC	AtriCure -- cardiac ablation/AtriClip leader guiding first-ever profitable year;	Q2 earnings 2026-07-23 (date-certain binary)	CONFIRMED (StockTitan + MarketBeat + company IR)	\$1.7B cap [OK]; ADV ~\$17M/day; order <0.01% ADV
PHAT	Phathom -- VOQUEZNA revenue +104% YoY, operating profitability guided Q3 2026; P	Voquezna ramp -> Q3 profitability; Q2 print (date TBA)	Ramp CONFIRMED (SEC 8-K + StockTitan + ainvest); Q2 date INSUFFICIENT CONFIRMATI	ADV ~\$15-25M/day; vol ratio 2.1x; order <0.01% ADV
OPRT	Oportun -- consumer lender, reiterated Q2 guide, PT \$8.50 (+48%)	Q2 earnings 2026-08-12	CONFIRMED (SEC 8-K + TipRanks)	Alternate; subprime credit-cycle risk (12.2% NCO)
BLFS	BioLife -- bioprod./cryo, Strong Buy, PT \$30.86 (+19%)	Q2 earnings ~early Aug	Partial (date unconfirmed)	Superseded by PHAT (lower upside, off this week's screener)
TARA	Protara -- TARA-002 68% CR NMIBC; strong data	ADVANCED-2 / THRIVE-3 readouts "2H 2026"	Vague timeline -- no date-certain catalyst	Momentum-eligible but lower conviction; blocked by HC cap

Screener candidates evaluated & not selected (one line each):

- TARA (#1) -- best score but all catalysts vaguely dated "2H 2026"; healthcare-cap blocked once ATRC+PHAT taken.
- TOI (#4, HC) -- thin-margin oncology services; blocked by 2-name healthcare cap.
- SVC (#5, Real Estate) -- hotel/net-lease REIT with dividend-cut history and high leverage; SHO already fills Real Estate.

- CNMD (#6, HC) -- solid medtech but healthcare-cap blocked; less upside than ATRC.
 - ESPR (#7) -- squeeze setup (BBW 0.016) but flat momentum, RS negative; no near catalyst.
 - MLTX / EYPT / MXCT / IART (HC) -- healthcare-cap blocked.
 - CDZI (Utilities), HNST (Cons. Def.), PDO (closed-end fund -> excluded by rules), NCI (\$28M cap, thin) -- lower conviction / rule-excluded.
-

5. PORTFOLIO ACTIONS

- Keep: WKC -- 1-share runner, de-risked by the +30% partial; hold through the 7/23 print on a raised stop.
- Keep: SHO -- quality operator at fair value; the \$10.90 stop is the risk manager into 8/6 earnings.
- Keep: TDAY -- book leader, AI-licensing inflection (Q1 adj. EBITDA +45%); raise stop to trailing level.
- Keep: TILE -- beat-and-raise breakout into 7/31 earnings; Buy, PT \$36-37; stop \$31 stays.
- Raise stop: WKC \$29.20 -> \$32.50 / \$32.35 -- locks +25% ahead of the binary 7/23 print (trades 23% above the highest analyst PT of \$33). Re-place at broker -- this slot was cancelled to execute the partial.
- Raise stop: TDAY \$7.20 -> \$7.55 / \$7.45 -- trailing rule (15% below the 20-day high of \$8.86).
- Initiate: ATRC -- 3 shares (~14.5% of equity) -- the queued #1 name; Strong Buy, first profitable year, PT \$49.60; binary-event play into 7/23 earnings.
- Initiate: PHAT -- 5 shares (~9.0% of equity) -- screener rank 2 momentum play; Voquezna +104% YoY, Q3 profitability; PT +90%.

This takes the book from 4 -> 6 positions (the aggressive-posture target), deploying ~\$168 of the 40% cash while holding the reserve at 16.5%.

6. EXACT ORDERS

Order 1 -- Raise WKC protective stop (re-place; no buy/sell)

- Action: modify stop (GTC stop-limit)
- Ticker: WKC
- Shares: 1 (runner)
- Stop Loss: \$32.50 -- locks +25% ahead of the 7/23 binary print; WKC trades 23% above the top analyst PT
- Stop Limit: \$32.35
- Time in Force: GTC
- Special Instructions: This is a re-placement -- the WKC stop was cancelled to execute the 7/10 +30% partial and is currently NOT live. Re-arm at the new level.
- Rationale: Protect the runner's gain into an earnings event where the name is already well above consensus.

Order 2 -- Raise TDAY protective stop

- Action: modify stop (GTC stop-limit)
- Ticker: TDAY
- Shares: 16
- Stop Loss: \$7.55 -- 15% below the 20-day high (\$8.86), standard trailing rule
- Stop Limit: \$7.45
- Time in Force: GTC
- Rationale: Ratchet protection on the book leader without whipsaw-tight placement.

Order 3 -- Initiate ATRC (binary-event play)

- Action: buy
- Ticker: ATRC
- Shares: 3
- Order Type: limit

- Limit Price: \$34.50
- Time in Force: DAY
- Intended Execution: 2026-07-13 (Monday)
- Stop Loss: \$30.50 -- binary-event override: recent-range support (~\$30) / below the \$32 consolidation floor, not ATR. Auto-expires within 1 trading day of the 7/23 print (recalculate to standard trailing stop).
- Stop Limit: \$30.30
- Special Instructions: Pre-open verification required -- check Monday pre-market before executing. If ATRC is down >2% pre-market, drop the limit to the pre-market price or pass. Hold-through-earnings binary risk is acknowledged and sized within the 15% cap.
- Rationale: Queued #1 catalyst name; Strong Buy, first profitable year, PT \$49.60 (+44%) into a dated 7/23 print.

Order 4 -- Initiate PHAT (momentum play)

- Action: buy
- Ticker: PHAT
- Shares: 5
- Order Type: limit
- Limit Price: \$12.85
- Time in Force: DAY
- Intended Execution: 2026-07-13 (Monday)
- Stop Loss: \$11.55 -- ~10% below entry (standard momentum stop; wider of 1.5xATR / 10%)
- Stop Limit: \$11.45
- Special Instructions: Pre-open check; if PHAT gaps >2% below \$12.61 pre-market, reduce to a limit at the pre-market price. Minimum 5-day hold applies.
- Rationale: Screener rank 2; VOQUEZNA revenue +104% YoY, Q3 operating profitability guided, PT \$24 (+90%).

7. RISK AND LIQUIDITY CHECKS

Post-trade concentration (% of \$713.68 equity):

Holding	Value	% of Equity
SHO	\$123.42	17.3%
TDAY	\$136.16	19.1%
TILE	\$133.04	18.6%
ATRC	\$103.50	14.5%
PHAT	\$64.25	9.0%
WKC (runner)	\$35.32	4.9%
Cash	\$117.99	16.5%

- No single position exceeds 30%. [OK]
- Cash after trades: \$117.99 = 16.5% -- above the 15% floor. [OK]
- Binary-event plays: 1 (ATRC only; PHAT is a momentum play). [OK]
- Sector map: Energy (WKC), Real Estate (SHO), Comm. Services (TDAY), Cons. Disc. (TILE), Health Care x2 (ATRC, PHAT) -- at the 2-name cap, not exceeded. [OK]
- Per-order ADV: ATRC \$103.50 and PHAT \$64.25 are each <0.01% of daily dollar volume -- no slippage concern (guard is 5% of ADV). [OK]

Sizing math shown:

- ATRC risk: $3 \times (\$34.50 - \$30.50) = \$12.00 = 1.68\%$ of equity (binary cap \$107.05 -> 3 sh binds before the 5% risk budget).
- PHAT risk: $5 \times (\$12.85 - \$11.55) = \$6.50 = 0.91\%$ of equity (cash/floor constraint binds; full 5%-risk sizing would be 27 sh, far above the reserve).

8. MONITORING PLAN

- ATRC -- 7/23 earnings is the event. Watch for pre-print drift toward the \$30.50 stop; on the print, remove the binary override within 1 trading day and reset to a trailing stop. Watch competitive-risk headlines (analysts flagged new competition).
 - PHAT -- confirm the Q2 earnings date once announced (likely early Aug); watch VOQUEZNA prescription trend and any payer-coverage news. Honor the 5-day minimum hold; stop \$11.55.
 - WKC -- 7/23 earnings; the raised \$32.50 stop is the plan. If it rips post-print, trail up; if it fades, the stop harvests +25%. Confirm the re-placed stop is live at the broker.
 - TDAY -- Q2 print late July; watch for a hold above \$8.80 to justify a further stop-raise toward ~\$7.80. AI-licensing deal-flow is the thesis driver.
 - SHO -- 8/6 earnings; watch RevPAR/AFFO vs the raised guidance. Stop \$10.90 locks +6.9%.
 - TILE -- 7/31 earnings; breakout intact above \$33. Trail up on new highs above \$36; stop \$31 until then.
 - Regime -- re-check IWM vs 50-day SMA next weekend; a break below freezes new momentum adds.
-

9. THESIS REVIEW SUMMARY

(This section is saved separately as Week 44 Summary.md.)

WKC -- KEEP | Conviction 4/5. A 1-share runner after the rule-mandated +30% partial, now +35.8%. Trades 23% above the highest analyst PT (\$33) on a Hold consensus, so the raised \$32.50 stop (locking +25%) -- re-placed at the broker after the partial cancelled it -- is the right posture into the 7/23 print. Let the print prove itself; the stop harvests either way.

SHO -- KEEP | Conviction 3/5. Quality operator at fair value (\$11.08 PT vs \$11.22). No new catalyst until 8/6 earnings; the \$10.90 stop (locking +6.9%) does the risk work. Raise only on a decisive push through \$12.

TDAY -- KEEP | Conviction 4/5. The book's leader -- Q1 adjusted EBITDA +45%, AI-licensing deals accretive, digital-only subscription growth returning. Stop raised to \$7.55 (trailing). A hold above \$8.80 into the late-July print unlocks a further raise toward \$7.80.

TILE -- KEEP | Conviction 4/5. Beat-and-raise breakout holding near highs into 7/31 earnings; Buy consensus, PT \$36-37 (+9%). Stop \$31 keeps it loss-free; trail above \$36.

ATRC -- INITIATE | Conviction 3/5 (catalyst play). The long-queued #1 name finally funded. AtriCure guides its first profitable year; Strong Buy, average PT \$49.60 (+44%) into a date-certain 7/23 earnings print. Sized at the 15% binary cap (3 sh) with a support-based override stop (\$30.50) that auto-expires post-print. Pre-open verification Monday. Bear case: pre-print binary risk and newly-flagged competitive pressure -- hence the capped size and the wide-but-defined stop.

PHAT -- INITIATE | Conviction 3/5 (momentum play). Screener rank 2, and the fundamentals back the tape: VOQUEZNA revenue +104% YoY, 1.1M scripts filled, operating profitability guided for Q3 2026, PT \$24 (+90%). Entered as a momentum play (earnings date not yet dated) above its 20-day SMA with a standard 10% stop. Bear case: single-drug dependency, still pre-profit until Q3, and a hot 20-day move (+22.8%) that could mean-revert -- sized modestly (9%) to respect that.

Overall portfolio thesis. Week 44 of 52, and for the first time since the pivot we are trailing (TWR alpha ?1.35%, gap ?6.1%). Per the aggressive directive, this is the week to stop hoarding the 40% reserve and put it to work -- the S&P rebound that eroded our lead won't be out-defended from cash. The plan deploys ~\$168 into the two highest-conviction queued/screened names (ATRC catalyst + PHAT momentum), taking the book to the full 6 positions while keeping the reserve at 16.5%. Two winners (WKC, TDAY) get raised stops to protect gains into their prints -- aggression on offense, discipline on defense. Ten weeks remain: this is the redeployment the queue was built for.

10. CONFIRM CASH AND CONSTRAINTS

- Starting cash: \$285.74

- ATRC buy: ?\$103.50 (3 x \$34.50)
- PHAT buy: ?\$64.25 (5 x \$12.85)
- Ending cash: \$117.99 (16.5% of equity) -- above the 15% floor [OK]
- Positions: 6 of max 6 [OK]
- Sector cap: Health Care x2 (at cap, not exceeded); all others <=1 [OK]
- Binary-event plays: 1 (ATRC) [OK]
- Largest position: TDAY 19.1% (< 30% cap) [OK]
- Regime filter: GREEN (IWM > 50-day SMA) [OK]
- Liquidity: all orders <0.01% of ADV [OK]
- All stops set/raised on every holding [OK]

Note: Stop changes and buys are recommendations. They become portfolio reality only after you execute them at the broker (with actual fills) -- then I log them. ATRC/PHAT limits assume Monday execution with pre-open verification; report actual fills back.

Week 44 Full report generated 2026-07-12 by Claude Code (Aggressive posture). Prices as of 2026-07-10 close; catalysts confirmed 2026-07-12 via WebSearch.
