

Week 47 Deep Research -- Full Report

Date: Sunday, August 2, 2026

Week: 47

1. RESTATED RULES

- Long-only, full shares, no options/margin/shorting. U.S.-listed common <=\$2B cap; names above \$2B (WKC) are hold-only.
- Cash floor 15% of equity (\$109.83 today); no new capital. Track to the cent.
- Sizing: risk <=5% equity/trade; <=30%/name; binary-event plays max 1 at <=15% equity.
- Momentum plays above the 20-day SMA at entry; catalyst plays need a dated catalyst <=60 days.
- Entry discipline (.claude/rules/entry-discipline.md): post-earnings cooldown; distance-from-base (<=20% above 20-day SMA); Thesis-Input Freshness (verify time-varying drivers current); Day-1 Drawdown Rule (exit a fresh position closing <=?8%); screener score = sourcing (2/5 floor), not conviction.
- Price integrity (.claude/rules/price-data-integrity.md): settled closes from the daily run; live/AH/pre-market via the browser tool with a timestamp; order-side check before naming any stop/limit; verify candidate identity when a search result's price/sector doesn't match the screener.
- Sector cap <=2 per GICS sector; regime filter (IWM vs 50-day); one open order per stock; 10-day re-entry ban; >=2-source verification.

2. RESEARCH SCOPE

Data retrieved: 2026-08-02 ~20:00 ET. Holdings/closes as of Friday 2026-07-31 (settled). Screener regenerated 2026-08-02 -- clean run (corruption fix holding). WebSearch used for catalysts/dates/fundamentals only.

Live sources (WebSearch, 2026-08-02): ARDT (Yahoo/Markets Daily/scanx -- Q2 earnings Aug 4 confirmed, EPS est \$0.17), FIGS (StockTitan/Business Wire -- Q2 Aug 6 confirmed), AMCX (Daily Political/StockStory -- Q2 missed, Netflix \$500M deal), PHAT (GlobeNewswire/Seeking Alpha -- Q2 beat but FY guide cut), DMC (Investing.com -- returned DMC Global/BOOM ~\$6, identity mismatch vs screener's "\$29.71").

Checks: regime (IWM vs 50-day -- refresh below), universe ceiling, excluded classes (BDC), liquidity, sector map, binary-event count, entry-discipline distance/cooldown, candidate identity, cash floor.

3. CURRENT PORTFOLIO ASSESSMENT

Ticker	Role	Entry Date	Avg Cost	Current Price	Current Stop	Conviction (1-5)	Status
WKC	Energy -- runner (at \$2B cap)	2026-04-27	\$26.00	\$39.86 (+53.3%)	\$37.65 / \$37.50	4/5	KEEP -- +60% partial at \$41.60; stop locks +44.8%
SHO	Real Estate -- quality REIT	2026-05-18	\$10.20	\$11.77 (+15.4%)	\$10.90 / \$10.80	3/5	KEEP -- earnings 8/6; \$12 stop-raise trigger

TDAY	Comm. Services -- AI-licensing	2026-06-08	\$8.15	\$8.69 (+6.6%)	\$7.55 / \$7.45	4/5	KEEP -- earnings 8/6 (confirmed)
TILE	Cons. Cyclical -- beat-and-raise	2026-06-15	\$32.10	\$34.26 (+6.7%)	\$31.00 / \$30.85	4/5	KEEP -- earnings date pending IR reconfirm
ATRC	Health Care -- post-catalyst	2026-07-13	\$34.30	\$37.76 (+10.1%)	\$36.00 / \$35.85	4/5	KEEP -- held its stop through the ?12% PT-trim slide

Equity: \$732.23 · Cash: \$173.54 (23.7%) · Gap (scoreboard): ?2.6% (\$732.23 vs \$751.73) · TWR alpha: +2.87% · (See Strategic Pivot -- Week 46 Readout.md for the full since-April context.)

4. CANDIDATE SET

Ticker	One-Line Thesis	Key Catalyst	Catalyst Confirmation	Liquidity Note
ARDT	Ardent Health -- profitable hospital operator, FY EPS \$0.90-1.27, Q1 rev +7%	Q2 earnings Aug 4 (after close)	CONFIRMED (Markets Daily + scanx + Yahoo)	\$1.5B cap [OK]; NYSE, ample ADV; calm base (+9%/20d)
FIGS	FIGS -- DTC medical scrubs/apparel, profitable, demand-normalization turnaround	Q2 earnings Aug 6 (after close)	CONFIRMED (StockTitan + Business Wire)	\$1.8B [OK]; queued #2 (Cons. Cyclical)
PHAT	Phathom -- VOQUEZNA +88% YoY, first positive op-profit	Q2 already reported 7/30	Reported -- FY guide cut, shares fell	Thesis dented; off the queue
AMCX	AMC Networks -- Netflix/Walking Dead \$500M licensing	Q2 reported 7/30 -- missed	Reported -- rev ?8.8% YoY, Zacks Strong Sell	Melting-ice business; pass

Screener candidates evaluated & not selected (one line each):

- DMC (#1) -- search returned DMC Global (ticker BOOM, ~\$6), which does not match the screener's "DMC \$29.71/\$1.4B" -> identity unverified, pass pending confirmation (price-integrity identity check).
- PLX (#2) -- Protalix, \$191M micro-cap biotech at \$2.37; below liquidity comfort, no dated catalyst.
- AMCX (#3) -- Netflix deal real but the quarter missed (rev ?8.8%), Zacks Strong Sell; catalyst is a sugar-high on a declining linear-TV business (CERT-like value trap).
- TWO (#4) -- Two Harbors mortgage REIT, 0 momentum, below 20-day SMA; SHO already fills Real Estate.
- CCO (#5) -- Clear Channel Outdoor, \$2.42, high leverage, no momentum.
- OXSQ (#6) -- Oxford Square Capital: a BDC (closed-end) -> excluded class.
- CFFN (#7) -- sleepy thrift, +4.5%/20d, no catalyst.
- ABR (#8) -- Arbor Realty mortgage REIT, below 20-day SMA, credit-cycle risk.
- WALD (#9) -- Waldencast, \$1.73 micro-cap, no catalyst in window.
- FIGS (#10) -- genuine dated catalyst (Aug 6), profitable DTC -- queued #2 behind ARDT (chose ARDT on higher fundamental conviction).
- MDXG (#11) -- MiMedx, ?3%/5d, below 20-day SMA.
- LIFE (#12) -- small financial, no verified dated catalyst; thesis unconfirmed.
- OCFC / PDM / PRG (#13-15) -- thrift / office REIT / lease-to-own, all below 20-day SMA or catalyst-free.

Net: initiate ARDT (pre-print binary-event play into the Aug 4 earnings); FIGS queued #2 (Aug 6).

5. PORTFOLIO ACTIONS

- Keep: WKC, SHO, TDAY, TILE, ATRC -- all stops correctly placed from the recent raises; SHO + TDAY hold through their 8/6 prints on current stops (do not tighten into a print and invite a gap-out).
- Initiate: ARDT -- 5 shares (~\$54, ~7.3% of equity) -- profitable hospital operator into a confirmed Aug 4 earnings beat setup; the quality dated-catalyst deploy the readout called for, not a momentum chase. Sized small by the cash floor, not by conviction.
- Add to / Trim / Exit: none. Stop changes: none -- WKC (\$37.65) and ATRC (\$36.00) are already snug from last week; further tightening risks whipsaw on names carrying the book.

Press-and-protect: the aggressive "press" is the ARDT catalyst add; the "protect" is already in place via last week's WKC/ATRC stop raises (locking +44.8% / +5%). Both sides, deliberately.

6. EXACT ORDERS

Order 1 -- Initiate ARDT (binary-event play)

- Action: buy · Ticker: ARDT · Shares: 5
 - Order Type: limit · Limit Price: at/below \$10.80 (last verified ~\$10.64 on 2026-07-26; reconfirm Monday pre-open)
 - Time in Force: DAY · Intended Execution: 2026-08-03 (Monday)
 - Stop Loss: \$9.55 -- ~10% below entry (standard); binary gap-risk acknowledged -- an earnings miss can gap through this
 - Stop Limit: \$9.45
 - Special: Pre-open verification required (browser tool, timestamped) -- if ARDT gaps >2% above \$10.80 or the price can't be verified, use a limit at/below the verified pre-market print, don't chase. Pre-print entry = binary risk on the Aug 4 report, sized within the 15% cap.
 - Order-side check: stop \$9.55 < intended entry \$10.80 [OK] (run again against Monday's verified price)
 - Rationale: profitable hospital operator, analysts expect a beat; dated catalyst in 2 sessions; adds catalyst torque at ≤0.75% equity risk.
-

7. RISK AND LIQUIDITY CHECKS

Post-trade (ARDT 5 @ \$10.80):

Holding	Value	% of Equity
WKC	\$39.86	5.4%
SHO	\$129.47	17.7%
TDAY	\$139.04	19.0%
TILE	\$137.04	18.7%
ATRC	\$113.28	15.5%
ARDT	\$54.00	7.4%
Cash	\$119.54	16.3%

- No position >30% [OK] · Cash 16.3% > 15% floor [OK] (floor binds the deploy size -- ARDT is ~\$54 max)
 - Sectors: Energy, Real Estate, Comm. Services, Cons. Cyclical, Health Care x2 (ATRC, ARDT) -- at the 2-cap [OK]
 - Binary-event plays: 1 (ARDT ≤15%) [OK]
 - ARDT stop-risk: 5 x (\$10.80 - \$9.55) = \$6.25 = 0.85% of equity (gap risk could exceed on a miss) [OK]
 - Aggregate stop-risk if all six fired: = 4.2% of equity.
-

8. MONITORING PLAN

- Tue 8/4 -- ARDT earnings (after close): the binary. Beat + guide-raise -> hold, trail to a standard stop; miss -> the \$9.55 stop (gap risk acknowledged); apply post-catalyst reassessment within 1 trading day.
 - Wed 8/5 / Thu 8/6 -- TDAY + SHO earnings (both 8/6): two holdings print same day. Hold through on current stops; TDAY raise on a close >\$8.86, SHO on a push >\$12.
 - FIGS 8/6: watch as the queued #2 -- a beat + base could earn a Week-48 entry.
 - WKC: \$41.60 = +60% partial (1-share exit-or-hold); stop \$37.65 locks +44.8%.
 - ATRC: stabilized post-PT-trim; \$36.00 stop locks +5%. Watch AtriClip-vs-Edwards commentary.
 - Regime: IWM \$291.20 vs 50-day ~\$291 -- on the line; pull a fresh dated 50-day Monday before ARDT entry. A confirmed break below freezes further momentum initiations (ARDT is catalyst-driven, so still permitted, but note it).

9. THESIS REVIEW SUMMARY

(Saved separately as Week 47 Summary.md.)

WKC -- KEEP | 4/5. +53%, at the \$2B cap (hold-only), stop \$37.65 locks +44.8% into the \$41.60 partial. Ride on a tight leash.

SHO -- KEEP | 3/5. +15.4% into its 8/6 print; stop \$10.90. Raise toward ~\$11.10 on a push >\$12.

TDAY -- KEEP | 4/5. +6.6% into its 8/6 print; Citizens PT \$10. Stop \$7.55; next raise on a close >\$8.86.

TILE -- KEEP | 4/5. +6.7%; earnings date being reconfirmed via IR (the "7/31" never verified). Stop \$31.00.

ATRC -- KEEP | 4/5. +10.1%; the beat-and-raise held through a ~12% two-day PT-trim slide without breaching its \$36.00 stop -- exactly what a well-placed stop is for. Watch competitive commentary.

ARDT -- INITIATE | 3/5 (binary catalyst). A profitable hospital operator into a confirmed Aug 4 earnings print that analysts expect it to beat -- the quality, dated-catalyst entry the Week 46 readout prescribed after two momentum-chase losses. Sized small (~7%) by the cash floor, 10% stop with acknowledged gap risk. Healthcare goes to its 2-name cap.

Overall portfolio thesis. Scoreboard: gap ~2.6%; TWR alpha +2.87% -- the repair holds, the lead does not (yet). Per the Aggressive directive this is a deploy week, but disciplined by the readout's lesson: the one initiation is a profitable, dated-catalyst name (ARDT), not the screener's hot momentum (AMCX's Netflix sugar-high on a missed quarter, PLX/CFFN's catalyst-free drift). The 15% floor caps the deploy at ~\$54, so this is a torque add, not a big swing. Two winners keep their snug stops; two holdings (TDAY, SHO) report 8/6. Seven weeks left: convert bursts into a held lead by raising the hit rate on new money -- starting with an entry that has a fundamental floor under it.

10. CONFIRM CASH AND CONSTRAINTS

- Starting cash: \$173.54 · ARDT buy: ~\$54.00 -> Ending cash: \$119.54 (16.3%) -- above the 15% floor [OK]
 - Positions: 6 of max 6 [OK] · Sectors: Health Care x2 at cap, others <=1 [OK] · Binary plays: 1 (ARDT) [OK] · Largest: TDAY 19.0% < 30% [OK]
 - Regime: IWM on its 50-day (~\$291) -- refresh Monday; ARDT is catalyst-driven so permitted regardless [OK]
 - Universe: WKC at \$2B logged hold-only [OK] · Identity: DMC flagged unverified, excluded [OK]
 - Price integrity: ARDT limit to be re-checked against Monday's verified pre-open; order-side check passed on the reference price [OK]
 - Note: orders are recommendations -- real only after broker execution with actual fills, which I then log. Reconfirm ARDT's price Monday pre-open before executing.
