

Week 45 Deep Research -- Full Report (Rev. 2 -- corrected screener)

Date: Sunday, July 19, 2026 (revised Monday, July 20 with the repaired screener watchlist)

Week: 45

> Revision note: the original Week 45 run invoked the No-Candidates rule because the screener universe was corrupted (every ticker's first character doubled by a Finviz page change -- TotalEnergies masquerading as a \$1.6B small-cap). screener.py now auto-repairs the corruption, validates ticker identity against a second price source, and excludes CEFs/ADRs/units at the source. This revision re-evaluates the clean watchlist. The portfolio decision is unchanged -- but now for per-candidate reasons, not data failure.

1. RESTATED RULES

- Long-only, full shares, no options/margin/shorting. U.S.-listed common stock $\leq$ \$2B market cap on NYSE/NASDAQ/NYSE American. No OTC, ETFs/ETNs/closed-end funds (incl. BDCs), SPACs, ADRs, warrants/units/preferreds, defence, or Israeli-affiliated names.
 - Cash floor 15% of equity; no new capital beyond snapshot (\$177.29). Track to the cent.
 - Sizing: risk $\leq$ 5% of equity per trade; $\leq$ 30% per name; binary-event plays max 1 at $\leq$ 15% of equity (ATRC currently holds this slot).
 - Stops on everything; binary override to technical support allowed, auto-expiring at event resolution.
 - Momentum plays above the 20-day SMA at entry; 5-day minimum hold. Catalyst plays need a confirmed catalyst within 60 days.
 - Entry discipline (.claude/rules/entry-discipline.md): no buys in days 1-3 of a $>$ +10% breakout; $\leq$ 40% above 50-day SMA / $\leq$ 20% above 20-day SMA; post-earnings cooldown; screener score is sourcing, not conviction (2/5 floor).
 - Sector cap: $\leq$ 2 per GICS sector. Regime filter: IWM below 50-day SMA freezes momentum initiations.
 - Re-entry ban: 10 trading days post-stop-out (PHAT through ~7/27).
 - One open order per stock; No-Candidates rule; $\geq$ 2-source verification for every ticker and catalyst.

2. RESEARCH SCOPE

Data retrieved: 2026-07-19 ~18:30 ET (holdings/context) and 2026-07-20 ~09:15 ET (corrected screener + candidate verification). Prices as of Friday 2026-07-17 close; screener regenerated 2026-07-20 after the corruption fix (856-stock universe, 15 candidates, all verified genuine).

Live sources consulted (WebSearch):

- Regime: IWM 50-day SMA \$290.80 (Barchart / Markets Daily 7/18); IWM \$294.04 -> above by ~1.1%.
- Candidates: IKT (SEC 8-K, ChartMill, company IR -- Phase 3 PAH, RA Capital \$50M), HTLD (SEC 8-K, TipRanks, public.com -- Q2 earnings 7/23), CADL (StockTitan, Seeking Alpha, businesswire -- CAN-2409 BLA Q4 2026), XNCR (GuruFocus, MarketBeat -- ESMO pop 7/17), GPPE (StockStory, Simply Wall St, timothysykes -- UBS PT hike 7/17), CCRN (StockTitan SEC filings, businesswire -- Knox Lane \$13.25 take-private, vote passed 7/16).
- Holdings (carried from 7/19 run): ATRC 7/23 + consensus (MarketBeat/StockTitan/WallStreetZen), WKC 7/23 (SEC 8-K), TDAY 7/30 (MarketBeat/Investing.com), TILE 7/31, SHO 8/6.

Checks performed: regime, universe ceiling, excluded classes (CEF/BDC/ADR), liquidity, sector map, binary count, re-entry blackout, entry-discipline distance/breakout-age tests, trailing-stop floors, cash floor.

3. CURRENT PORTFOLIO ASSESSMENT

Ticker	Role	Entry Date	Avg Cost	Current Price	Current Stop	Conviction (1-5)	Status
WKC	Energy -- runner post-partial	2026-05	\$26.00	\$36.50 (+40.4%)	\$32.50 / \$32.35	4/5	KEEP -- earnings 7/23; stop locks +25%
SHO	Real Estate -- quality REIT	2026-06	\$10.20	\$11.73 (+15.0%)	\$10.90 / \$10.80	3/5	KEEP -- 2.3% from \$12 raise trigger; earnings 8/6
TDAY	Comm. Services -- AI-licensing	2026-06	\$8.15	\$8.50 (+4.3%)	\$7.55 / \$7.45	4/5	KEEP -- earnings 7/30; Citizens PT
TILE	Cons. Disc. -- beat-and-raise	2026-06	\$32.10	\$33.06 (+3.0%)	\$31.00 / \$30.85	4/5	KEEP -- earnings 7/31; Strong Buy
ATRC	Health Care -- binary event	2026-07-13	\$34.30	\$34.95 (+1.9%)	\$30.50 / \$30.30 (override)	3/5	KEEP -- earnings Thu 7/23 AC; playbook armed

Equity: \$715.91 · Cash: \$177.29 (24.8%) · Gap (scoreboard): ?4.4% (\$715.91 vs \$748.52 S&P-equivalent) · TWR alpha (process check): +0.77%.

4. CANDIDATE SET (corrected screener, all tickers verified genuine)

Ticker	One-Line Thesis	Key Catalyst	Catalyst Confirmation Status	Liquidity Note
CADL	Candel Therapeutics -- CAN-2409 Phase 3 prostate: 39% DFS improvement (58-mo fol	BLA submission Q4 2026; NSCLC pivotal underway	CONFIRMED (StockTitan + Seeking Alpha + AUA data)	\$737M [OK]; +22.5%/20d but not a days-1-3 spike
HTLD	Heartland Express -- freight-cycle turn; Q1 loss narrowed to ?\$0.06 vs ?\$0.128 e	Q2 earnings Thu 7/23	CONFIRMED (TipRanks + public.com)	\$1.16B [OK]; 1.7x volume accumulation
IKT	Inhibikase -- Phase 3 PAH (IMPROVE-PAH); RA Capital \$50M backing 7/14	Topline data years out (Part B ~346 pts)	Confirmed but outside any timing window	\$283M; \$2.11 price; fresh 25M-share dilution
XNCR	Xencor -- XmAb819 ccRCC (25% ORR), ESMO oral	ESMO presentation (dated but H2); pivotal 2027	CONFIRMED -- but +17% pop was 7/17	\$1.3B [OK]; +38%/20d -- breakout day 2
GPRE	Green Plains -- ethanol EBITDA inflection; UBS PT \$12->\$20	UBS estimate reset 7/17; Q2 earnings ~early Aug	CONFIRMED -- but +11.9% pop was 7/17	\$1.3B [OK]; 52-wk high; breakout day 2
CCRN	Cross Country Healthcare -- Knox Lane \$13.25 cash take-private	Merger close Q3 2026 (vote passed 7/16)	CONFIRMED	Arb spread ? \$0.01 (0.08%) -- no edge

Evaluated & not selected (one line each):

- CADL -- the genuine new candidate, but it competes for the single open Health Care slot whose fate ATRC's Thursday print decides; deferring to Week 46 costs ~3 sessions and buys resolution of the book's biggest event. Queued #1.
- HTLD -- entering 2 sessions before its print under a Neutral posture repeats the pattern the rules were built to prevent; post-print entry per the cooldown rule is the cleaner shape. Queued #2.
- IKT (#1 by score) -- no catalyst inside any window, \$2 stock, fresh 25M-share dilution; screener-floor conviction 2/5.
- XNCR (#5) -- day 2 of a +17% breakout: entry-discipline disqualification (days 1-3 of >+10% move); re-eligible after >=1 week of consolidation.
- GPRE (#15) -- day 2 of a +11.9% breakout at a 52-week high on an analyst note (UBS kept it Neutral while doubling the PT): same disqualification; watch for a higher-low base.
- CCRN (#14) -- merger arb with a closed vote and a 1-cent spread; the squeeze signal (BBW 0.006) is the deal price pinning it, not a setup.
- CSWC / OCSL (#4, #12) -- BDCs: closed-end investment companies -> excluded class.
- JBGS (#6) -- DC office REIT, no catalyst in window, weakest structural story on the list.
- RLJ (#9) -- hotel REIT: would double the book's lodging exposure (SHO) within the Real Estate cap -- concentration without diversification.
- TNDM (#8) -- diabetes-tech turnaround, +11.6%/20d, but Health Care slot contention (behind CADL) and earnings ~8/5 unverified this session.
- AMCX (#10) -- melting-ice cable equity; momentum without a durable catalyst; pass.
- CFFN (#13) -- sleepy thrift, +6.7%/20d, no catalyst; pass.

Net: two credible candidates (CADL, HTLD) -- both better entered AFTER Thursday resolves. This is a timing deferral, not a No-Candidates finding.

5. PORTFOLIO ACTIONS

- Keep: WKC, SHO, TDAY, TILE, ATRC -- unchanged from Rev. 1; every stop at/above its trailing floor; no thesis weakened.
 - Initiate: none this week -- the two credible candidates (CADL, HTLD) are deliberately queued for Week 46, gated on Thursday's ATRC/HTLD prints:
 - CADL -- takes the Health Care slot at Week 46 if ATRC stops out on a miss (slot opens) or if ATRC beats and the sleeve cap still allows (it would -- HC would be at 2 only if both held). Entry only on a non-extended base per distance rules.
 - HTLD -- post-print entry per the cooldown rule: either pre-open Monday 7/27 after >=1 week... no -- after the 7/23 print, wait for the post-print close; enter only if not >+5% above it, or after a higher-low base forms.
 - Add to / Trim / Exit: none. Stop changes: none (all verified against trailing floors -- see Rev. 1 detail).
-

6. EXACT ORDERS

None this week -- no buys (candidates queued behind the 7/23 prints), no sells, no stop modifications. The five resting GTC stop-limits remain the only open orders:

- WKC: stop \$32.50 / limit \$32.35 (GTC)
 - SHO: stop \$10.90 / limit \$10.80 (GTC)
 - TDAY: stop \$7.55 / limit \$7.45 (GTC)
 - TILE: stop \$31.00 / limit \$30.85 (GTC)
 - ATRC: stop \$30.50 / limit \$30.30 (GTC -- binary override, expires at the 7/23 print)
-

7. RISK AND LIQUIDITY CHECKS

Holding	Value	% of Equity
WKC	\$36.50	5.1%
SHO	\$129.03	18.0%
TDAY	\$136.00	19.0%
TILE	\$132.24	18.5%
ATRC	\$104.85	14.6%
Cash	\$177.29	24.8%

- No position >30% [OK] · Cash 24.8% > 15% floor [OK] · Binary plays 1/1 (ATRC) [OK] · Sector caps [OK] · No orders -> no ADV impact [OK]
- Aggregate stop-risk if every stop fired from Friday's close: ~\$30.55 ? 4.3% of equity.

8. MONITORING PLAN

- Thu 7/23: ATRC Q2 after close (EPS consensus ~\$0.06; AtriClip-vs-Edwards commentary is the swing factor) + WKC Q2 after close + HTLD Q2 (watch as a candidate: loss-narrowing trajectory and freight-cycle commentary set up the Week 46 entry decision).
- Fri 7/24: post-catalyst reassessment (rule-mandated): strip ATRC's override stop, recalc trailing, re-rate conviction; log WKC's reaction; record HTLD's post-print close as the cooldown reference price.
- CADL: track daily into Week 46 -- entry requires a non-extended base (<=20% above 20-day SMA) and the HC-slot decision post-ATRC.
- XNCR / GPRE: consolidation watch -- re-eligible after >=1 week of higher-low base-building per the cooldown rule.
- TDAY 7/30, TILE 7/31: pre-print checks in the dailies; TDAY stop-raise re-arms on a close >\$8.86; SHO raise on a push through \$12.
- PHAT blackout ends ~7/27 -- reconsider only on fresh verification.
- Regime: IWM cushion ~1.1% -- a close below ~\$290.80 freezes momentum initiations automatically.

9. THESIS REVIEW SUMMARY

(Saved separately as Week 45 Summary.md.)

WKC -- KEEP | Conviction 4/5. The +40% runner meets its 7/23 print fully de-risked: the \$32.50 stop banks +25% on any fade; a beat extends it. No action improves this shape.

SHO -- KEEP | Conviction 3/5. +15.0%, 2.3% below the \$12 stop-raise trigger, earnings 8/6. The \$10.90 stop manages the tail until \$12 prints.

TDAY -- KEEP | Conviction 4/5. Citizens PT \$10; earnings 7/30. Stop \$7.55 at the trailing floor; next raise on a close above \$8.86.

TILE -- KEEP | Conviction 4/5. Strong Buy into the 7/31 print; stop \$31.00 keeps it loss-free.

ATRC -- KEEP | Conviction 3/5 (binary). Thursday decides it. Sized at the 15% cap, override stop \$30.50, max loss 1.9% of equity vs +30%+ on a beat-and-raise. Post-print: strip the override within 1 trading day.

Overall portfolio thesis. Scoreboard: gap ?4.4%; process check: TWR alpha +0.77% and improving. This revision replaces the corruption-forced No-Candidates finding with a real evaluation of a clean watchlist -- and the answer is the same hold, but earned: the two credible new names (CADL, queued for the Health Care slot; HTLD, queued post-print) are both better entered after Thursday's double print resolves, the two hottest tapes (XNCR, GPRE) are day-2 breakouts the entry rules explicitly refuse to chase, and the rest of the list fails on excluded classes (BDCs), dead arb spreads (CCRN), or catalyst-free momentum. Week 44's PHAT stop-out is the fresh reminder of what buying heat costs. The book enters the gauntlet

unchanged: 5 positions, every stop verified, 24.8% cash, one written playbook per print -- with a ranked redeployment queue (CADL -> HTLD -> XNCR/GPRE on consolidation) ready for Week 46.

10. CONFIRM CASH AND CONSTRAINTS
