

Weekly Portfolio Report -- Week 36 of 52

Report Date: 2026-05-23

Portfolio D

1. Restated Rules

- Budget: No new capital unless declared in <capital_injection>. Track cash to the cent.
- Execution: Long-only, full shares only. No options, shorting, leverage, margin, or derivatives.
- Universe: U.S.-listed common stocks, market cap up to \$2B. NYSE, NASDAQ, NYSE American only.
- Exclusions: OTC/pink sheets, ETFs/ETNs/SPACs, warrants/units/preferred/ADRs, bankrupt/halted, defence companies, Israeli-affiliated companies.
- Risk control: Stop-losses on all positions. Max 5% equity risk per trade. No single position >30% of equity. No averaging down past -5% without confirmed catalyst. Partial profit at +30%/+60%.
- Liquidity filters: Price >=\$1, ADV >=\$500K, spread <=2%, float >=5M shares. Above 20-day SMA at entry for momentum plays.
- Allocation: Max 5 concurrent positions. No more than 2 of 5 in same GICS sector. At least 15% cash reserve.
- Order defaults: Limit DAY orders. GTC only for stop-limit sells.
- Market regime: If IWM below 50-day SMA, restrict new initiations to high-conviction catalyst plays only.
- Entry discipline: 3-day post-earnings cooldown, distance-from-base limits (<=20% above 20d SMA, <=40% above 50d SMA), ATR-based stop sizing (wider of 1.75xATR(14) or recent swing low), pre-open verification on Monday buys.

2. Research Scope

Sources Consulted:

Source	What Was Checked	Timestamp
Yahoo Finance	ECVT, WKC, ACCO, SHO, OSPN, IMPP, OLPX, OSUR, NVRI, QNC, RBBN, BBAI, LPRO, ARKO,	2026-05-24 03:00 UTC
GlobeNewsWire / PR Newswire	ECVT Calabrian acquisition close timeline, NVRI Clean Earth sale details	2026-05-24 03:05 UTC
StockTitan	ECVT Q1 results, SHO guidance raise, WKC insider sales, OSPN buyback/ARR, IMPP Q	2026-05-24 03:08 UTC
Investing.com	ACCO Q1 earnings call, CRNC Q2 earnings, NVRI Q1 earnings	2026-05-24 03:10 UTC
Seeking Alpha	WKC analyst updates, SHO outlook, OSPN Q1 transcript	2026-05-24 03:12 UTC
SEC EDGAR (via StockTitan)	NVRI 8-K Clean Earth sale merger consideration, WKC Form 4 insider sales	2026-05-24 03:14 UTC

Quiverquant	IMPP Q1 earnings timing, NVRI Clean Earth June 1 close	2026-05-24 03:18 UTC
Quantitative Screener (screener.py)	Top 15 candidates by composite momentum/volume/squeeze score	2026-05-24 03:09 UTC

Searches Performed:

- Holdings catalyst/news search: ECVT, WKC, ACCO, SHO -- current prices, Q1 results, analyst actions, insider activity
- Screener candidate deep dives: IMPP, OLPX, OSUR, NVRI, QNC, RBBN, BBAI, OSPN, LPRO, ARKO, CRNC -- fundamentals, catalysts, liquidity, exclusion checks
- Market regime check: IWM vs 50-day SMA
- ECVT Calabrian acquisition close timeline verification
- NVRI Clean Earth sale cash payout per share and close date
- OSPN Q1 2026 earnings detail, ARR growth, buyback program

Data Gaps:

- Exact ATR(14) values for OSPN not available from web sources; estimated from price action and Bollinger Band Width
- QNC (screener rank #6) could not be conclusively identified -- Quantum eMotion Corp (TSX-V cross-listing) vs stale cache entry; excluded from evaluation

Market Regime Check:

- IWM closed at \$285.12 on May 22, 2026
- IWM 50-day SMA: \$279.06
- IWM is ABOVE its 50-day SMA -> All initiation types permitted (momentum + catalyst plays)

3. Current Portfolio Assessment

Ticker	Role	Entry Date	Avg Cost	Current Price	Unrealized P&L	Current Stop	Conviction (1-5)	Status
ECVT	Catalyst play	2026-04-14	\$13.99	\$13.81	-\$0.89 (-1.3%)	\$13.24 / \$13.14	4/5	Hold
WKC	Momentum play	2026-04-07	\$26.00	\$29.50	+\$7.00 (+13.5%)	\$25.00 / \$24.85	4/5	Hold -- raise stop
ACCO	Momentum play	2026-04-21	\$3.92	\$3.82	-\$2.90 (-2.6%)	\$3.53 / \$3.43	3/5	Watch
SHO	Momentum play	2026-05-18	\$10.20	\$10.62	+\$4.62 (+4.1%)	\$9.40 / \$9.30	4/5 (?)	Hold

ORN Exit (Week 35): Stopped out May 21 at \$13.50 (5 shares, cost \$11.88 adjusted basis). P&L: +\$8.10 total (+13.6% on adjusted cost). This was a major winner -- original entry at \$8.07, tightened stop locked in most of the +68% run.

Portfolio Summary:

- Total Equity: \$653.13
- Cash Balance: \$297.48
- S&P Equivalent: \$750.10
- Number of Holdings: 4
- Alpha gap: -\$96.97 (-12.9%) vs S&P benchmark -- 16 weeks remaining

4. Candidate Set

Screener Candidates Evaluated (top 5 + additional)

Ticker	One-Line Thesis	Key Catalyst	Catalyst Date	Confirmation Status	Mkt Cap	Avg Daily \$ Vol	Float	Liquidity Pass?
OSPN	Cybersecurity/digital identity with 14% ARR growth, \$50M

------	--	---------------------------	---------	---	--------	-------	-------	-----

Candidates Screened But Rejected

- OLPX (\$2.05): Being acquired by Henkel at \$2.06/share (closing July 2026). No upside -- pure merger arb at <1% spread. Not suited for alpha generation.
- OSUR (\$3.61): Q1 revenue fell 7% to \$27.9M, net losses widened to \$22.4M. Neutral analyst consensus. Weak fundamentals despite screener score.
- QNC (\$3.28): Could not conclusively verify ticker identity -- screener cache may contain stale data (Quantum eMotion Corp is a TSX-V company; cross-listing status unclear). Excluded.
- RBBN (\$2.79): Q1 revenue down 10%, net loss widened 32%. Hold rating with \$3 PT. Deteriorating fundamentals. Screener score is not conviction -- rejected per entry-discipline rule.
- BBAI (\$4.18): EXCLUDED -- defence company. BigBear.ai is primarily a defense/national security AI contractor. Portfolio rules explicitly exclude defence companies.
- LPRO (\$2.11): Hold rating, \$2 PT, modest revenue expectations. Insufficient catalyst strength for aggressive posture.
- IMPP (\$5.68): Strong Q1 (net income \$28M), but earnings released May 22 -- only 1 trading day ago. FAILS 3-day post-earnings cooldown. Cannot recommend entry until May 28 at earliest, and must then verify price is not >+5% above post-print close.
- CRNC (\$10.98): Amazon patent lawsuit is a genuine catalyst, but stock surged +15.3% in 5 days with +23% 20-day momentum. FAILS distance-from-base: days 1-3 of a new breakout with >+10% cumulative move. Re-evaluate in Week 37 if it

consolidates.

- ARKO (\$7.63): Improving EBITDA but still net-loss company (-\$5.6M Q1). Momentum score high (+17.6%) but conviction insufficient for initiation at aggressive posture without profitability.
- NVRI (\$19.60): Compelling special situation (June 1 close), but transaction complexity (cash payout + spinoff) introduces valuation uncertainty on the New Envirio stub. Clean catalyst play but not a clean momentum setup. Flagged for monitoring -- could become a position if stub discount widens.

Selected Candidate

OSPN (OneSpan) -- Best risk/reward for the aggressive posture:

- Fundamentals: Revenue +4% YoY to \$66M, ARR \$192M (+14% YoY), adjusted EBITDA margin 32%, net retention 105%. Raised ARR guidance.
 - Capital return: \$50M buyback program (announced May 11), plus \$0.13/share quarterly dividend.
 - Technical: Above 20-day SMA, +14.7% 20-day momentum, 1.2x volume ratio. Bollinger Band Width 0.159 (moderate -- not extended).
 - Post-earnings cooldown: Q1 reported April 30 -- 16 trading days ago. CLEAR.
 - Distance-from-base: +14.7% 20-day momentum implies ~7-10% above 20-day SMA (within 20% limit). CLEAR.
 - Sector: Technology -- no conflict with existing holdings (Materials, Energy, Consumer, Real Estate).
 - Screener rank: #9 (composite score 0.812, HIGH confidence). Conviction elevated to 3/5 on independent verification of ARR growth, buyback, and dividend.
-

5. Portfolio Actions

Keep

- ECVT -- Calabrian acquisition closing end of June is the primary catalyst. Q1 revenue +50% YoY, guidance raised. Stop \$13.24 provides -5.6% downside protection. Hold through close.
- WKC -- Thesis confirmed by Q1 blowout (Marine GP +82% YoY). Multiple analyst upgrades (Zacks Strong Buy, Raymond James Outperform). Insider sales are pre-planned 10b5-1 and non-material. Raise stop to protect gains.
- ACCO -- EPOS acquisition driving revenue beat (\$343.7M vs \$320.2M est). FY26 EPS guidance maintained at \$0.84-\$0.89. Stock not responding (-2.6%) but execution credible. Marginal -- recycle candidate if flat through Week 37.
- SHO -- New 52-week high (\$10.66 intraweek). Raised FY26 guidance (RevPAR growth 5.0-7.5%). \$458M buyback authorization provides floor. Conviction raised from 3/5 to 4/5 on confirmation of execution.

Add To

- None this week.

Trim

- None this week -- no position has reached +30% partial profit trigger.

Exit

- None this week.

Initiate

- OSPN -- 12 shares @ \$13.00 limit. Technology sector adds 5th sector to portfolio. \$50M buyback provides price support. ARR +14% with raised guidance. Screener-sourced, independently verified to 3/5 conviction.
-

6. Exact Orders

Order 1: BUY OSPN

Action:	buy	Ticker:
---------	-----	---------

"Place this stop with your broker before the next market open."

Order 2: STOP UPDATE -- WKC

Action:	update stop	Ticker:
---------	-------------	---------

7. Risk and Liquidity Checks

Position Concentration After Trades

Ticker	Value	% of Equity
ECVT	\$69.05	10.6%
WKC	\$59.00	9.0%
ACCO	\$110.78	17.0%
SHO	\$116.82	17.9%
OSPN (proposed)	\$156.00	23.9%
Cash	\$141.48	21.7%
Total	\$653.13	100.0%

Liquidity Check Per Order

Ticker	Order Size (\$)	3M Avg Daily \$ Vol	Order as % of ADDV	Pass?
OSPN	\$156.00	~\$6,500,000	0.002%	Yes -- negligible

Risk Flags

- OSPN concentration at 23.9%: Within the 30% cap but is the largest position. Acceptable given the buyback floor and aggressive posture.
 - ACCO marginal conviction (3/5): At -2.6% unrealized with flat price action despite Q1 beat. If stock doesn't respond by Week 37, consider recycling capital into a higher-conviction name.
 - Sector diversification: 5 positions across 5 GICS sectors (Materials, Energy, Consumer, Real Estate, Technology). No sector has 2 positions. PASS.
 - Memorial Day weekend: Markets closed Monday 5/25. Orders execute Tuesday 5/26 at earliest. Extended weekend = gap risk on open.
-

8. Monitoring Plan

ECVT

- Watch for: Calabrian acquisition close announcement (expected end of June). Any regulatory/antitrust filing updates. Sulfur pricing data.
- Action if triggered: If close announced -> hold through integration, reassess in Week 38. If close delayed past June 30 -> re-evaluate catalyst timeline.
- Check frequency: Daily scan for PR/8-K filings.

WKC

- Watch for: Follow-through above \$30 (round number resistance). Marine segment commentary from industry sources. Next insider sale disclosures under 10b5-1 plan.
- Action if triggered: If stock closes above \$31 -> consider raising stop to \$28. If drops below \$27 -> review whether post-Q1 momentum is fading.
- Check frequency: Daily price check.

ACCO

- Watch for: Q2 earnings (expected late July/early August). EPOS revenue contribution trajectory. Stock response to any sector rotation into value/industrials.
- Action if triggered: If stock breaks below \$3.60 (approaching stop at \$3.53) -> prepare exit order. If rallies above \$4.20 -> conviction upgrades to 4/5.
- Check frequency: Daily price check; stop proximity alert.

SHO

- Watch for: Continued buyback execution (\$458M remaining). Hotel sector RevPAR data. Interest rate expectations (hotel REITs sensitive). Q2 occupancy trends.
- Action if triggered: If stock holds above \$10.50 through Tuesday -> begin trailing stop calculation. If drops below \$10.00 -> review thesis (below entry would signal momentum failure).
- Check frequency: Daily price check.

OSPN (if filled)

- Watch for: Pre-market action Tuesday 5/26 (pre-open verification gate). Buyback execution disclosures. Customer win announcements. Next earnings expected late July.
- Action if triggered: If fill at \$13.00 -> place stop-limit \$12.00/\$11.90 immediately. If pre-market down >2% -> downgrade limit or pass. If day-1 close is -8% or worse -> exit at next open per day-1 drawdown rule.
- Check frequency: Pre-market check Tuesday AM; daily after that.

Portfolio-Level

- IWM regime: Currently above 50-day SMA (\$279.06). If IWM breaks below \$279, freeze new momentum initiations.
 - Memorial Day weekend risk: Extended 3-day weekend creates gap risk. No action required but watch for Tuesday open tone.
 - VIX: Monitor for any spike above 20 (currently implied calm market).
 - S&P gap: -12.9% (\$96.97). Aggressive posture maintained. Target: close gap by 5% per month over remaining 16 weeks through position selection and stop management.
 - IMPP re-evaluation: After May 28 (post-earnings cooldown clears), re-evaluate as a potential high-beta add if a position slot opens.
 - CRNC re-evaluation: If CRNC consolidates in the \$10-\$11 range through Week 37, the distance-from-base gate clears and it becomes a viable candidate (Amazon lawsuit is a durable catalyst).
-

Overall Portfolio Thesis -- Week 36 of 52

Portfolio enters Week 36 at \$653.13 equity, trailing the S&P equivalent by \$96.97 (-12.9%). The ORN stop-out last week was a controlled exit -- it locked in a +13.6% gain on the lot, demonstrating that the tightened-stop protocol works. The portfolio now has 4 holdings plus a pending OSPN initiation that would bring it to the full 5-position allocation.

Structural assessment:

5 position
Estate (SH

Key catalysts in the 10-day window (May 26 - June 5):

- ECVT Calabrian close (targeted end of June -- entering the window)
- NVRI Clean Earth sale close + spinoff (June 1) -- not a position but monitoring
- No earnings prints for current holdings

Scenarios (Week 36->37):

- Bull (30%): WKC breaks \$30 on momentum, SHO grinds to \$11 on buyback, OSPN fills and holds, ECVT gets Calabrian-close color -> equity \$680-\$710.
- Base (50%): Holdings consolidate, OSPN fills and drifts flat, ACCO remains stuck -> equity \$650-\$680.
- Bear (20%): Extended-weekend gap risk hits small caps, OSPN day-1 fade triggers exit, ACCO approaches stop -> equity \$620-\$645. Max aggregate stop-trigger downside: \$12.00 (OSPN) + \$8.41 (ACCO) + \$4.45 (ECVT) + \$0 (WKC stop above breakeven) + \$13.42 (SHO) = \$38.28 = 5.9% of equity.
